Safe Surgery Anywhere

Noor Medical helps health clinics improve their safe surgical capacity

IMPACT OF SAFE SURGERY

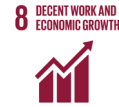

Our technology enables flexible medical instrument sterilization with a variety of energy inputs.

Reduce your dependency on the electricity grid and costly diesel generators.

Improved healthcare helps contribute to positive community development.

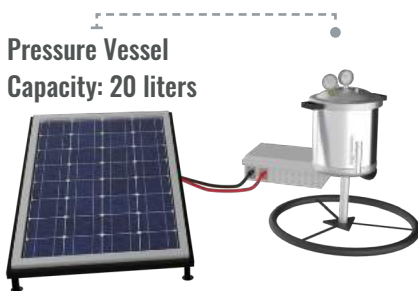

We are dedicated to improving maternal health outcomes through safe medical instrument sterilization.

Through its products and services Noor Medical helps health clinic operators who often do not have access to proper medical instrument sterilization devices and materials improve patient outcomes by **cost effectively** reducing post-operation infections and **improving the safety** of medical staff.

SAFE SURGERY ECOSYSTEM

HYBRICLAVE

Pressure Vessel Capacity: 20 liters

Interfaces with solar-PV, and other thermal energy sources

SMART INTEGRATION

IOT: Solar solution powers connectivity between Noor Connect & Hybriclave sterilizers - providing real-time monitoring

FUNCTIONALITY

Vacuum Sterilization: Full vacuum functionality even when electricity is not available thanks to steam-jet technology

Thermal Efficiency: Pressure vessel insulation prevents thermal losses and lowers energy requirements
